the sum of \$10 (cheque or money order made payable to the Minister of Finance), which is not refundable.

Construction of this contract shall conform to the requirements of the applicable sections of the Department's "General Specifications for Highway Construction." All copies purchased are registered and amendments are forwarded when issued.

Each tender must be accompanied by a bid bond or a certified cheque in accordance with clause (a) or clause (b) below:

(a) Where the total tender price exceeds \$100,000 a surety bid bond in an amount equal to 10 per cent of the tender price must accompany each tender. APPLICATION FOR PERMIT UNDER POLLUTION CONTROL ACT, 1967 (Emissions)

Preamble—B.C. Hydro and Power Authority maintains and operates the Port Mann Generating Station on the south bank of the Fraser River near the foot of the Port Mann Bridge. This station is in service to provide the Lower Mainland area with emergency back-up energy in the event of transmission-line failures from the large hydro-electric installations in the Interior of the Province. It also supplies extra energy to the Provincial system during critical low-water conditions at these hydro-electric stations.

The Port Mann Station contains four similar gas-turbine units, with a total generating capacity of 100,000 kilowatts. These units normally burn natural gas for fuel, but have the flexibility of burning liquid fuels as well. As originally designed, these units met the Provincial Level A Guidelines for all emissions, except oxides of nitrogen. The Authority subsequently modified the Port Mann units in order to conform with the Provincial A Levels for oxides of nitrogen.

THIS APPLICATION is to be filed with the Director, Pollution Control Branch, Parliament Buildings, Victoria, B.C. Any person who qualifies as an objector under section 13 (3) of the *Pollution Control Act, 1967* may, within 30 days of the date of application, or within 30 days of the date of publication in *The British Columbia Gazette* or in a newspaper, or, where service is required, within 30 days of the serving of a copy of the application, file with the Director an objection in writing to the granting of a permit, stating the manner in which he is affected. Those who do not so qualify may file with the Pollution Control Board an objection in writing under section 13 (6), in the same manner and time period as described above.

British Columbia Hydro and Power Authority, of 970 Burrard Street, Vancouver, B.C. V6Z 1Y3, hereby applies to the Director for a permit to discharge or emit contaminant(s) into the air from Port Mann Gas Turbine Generating Station located near the base of the Port Mann Bridge in Surrey, and gives notice of application to all persons affected.

The land upon which the works are located is Lots 17 and 21, Block 147, and Lots 1 to 3, Block 149, of Port Mann Plan 23003, also Block 148, Port Mann Plan 23002.

The discharge or emission shall be located within the perimeter of the property described above.

The rate of discharge is (dry basis):
(a) Maximum, 1,080,000 SCFM; duration, 16 hours a day; frequency, two months per five years. (b) Average daily (based on normal daily operating period), indeterminate.

The operating period during which contaminant(s) will be discharged is as required for emergency peaking or during adverse water conditions.

The characteristics of the contaminant(s) to be discharged are total particulate, 0.07 gr/DSCF at 12 per cent CO₂; NO_x as NO₂, 25 ppm; SO₂, 67 ppm.

The type of treatment to be applied to the contaminant(s) is that water injection is employed in all four gas-turbine units to control oxides of nitrogen (NO_x).

I, R. J. Hannon, Registrar, hereby certify that a copy of this application has been received by the Greater Vancouver Regional District.

This application, dated on the 8th day of June 1976, was posted on the ground in accordance with the Pollution Control Regulations.
